

## Clearpack has a new partner in stickpacks and sachets.

Clearpack Company is pleased to introduce its new partner, Inever S.L from Spain.

Inever S.L is one of the world's leading manufacturers of *stickpack* and multi-lane *sachet* machines. Founded in 1995, this innovative company has manufactured and delivered over 300 machines across the globe.

Inever stickpack and sachet machines are suitable for market sectors such as cosmetics, food, beverage and pharmaceuticals.

Striving for continual improvement Inever S.L has developed their machinery to have state of the art options and it is the only manufacturer who offers *Ultra-Clean* and *Aseptic filling* capability.

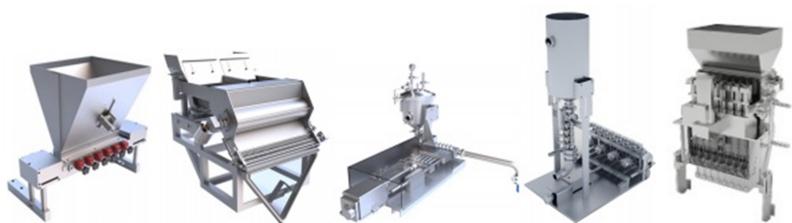

As a leading supplier of packaging equipment and solutions, Clearpack has extensive sales and service experience in the stickpack and sachet industry. Throughout our territory we have successfully supplied and supported this type of machinery for our customers over many years.

Now we are excited to have Inever S.L in solid partnership.

As they are a preferred manufacturer for many large customers, their product range will complement our scope of packaging engineering, products and services.

With our experience we can offer customers the best Inever equipment to suit their application.

Together with Inever, Clearpack will provide the solution to service the customer's needs.

A stickpack machine can be set up for a variety of filling applications.  
Examples: Granulates, Solids, Pastes, Liquids and Powders.
